

LAS VEGAS LIVING

HIGH TECH SKIN SOLUTIONS

Good, Better, Best!

JAMIE LEE METZ, founder and president Jamie Lee Metz, Advanced Aesthetics, LLC is a Certified Paramedical, Laser and Master Aesthetician who specializes in Advanced Anti-Aging Skin Treatments.

Jamie earned her post graduate certifications through The International Dermal Institute in Los Angeles, Image Skin Care Rx, and Cutera Laser under the direction of five highly skilled physicians. She is an expert in Laser Technologies, Advanced Chemical Exfoliations, Skin Analysis, Acupressure, Reflexology, Vitamin Therapies, Acne Treatments and Diamond Micro-dermabrasion.

High tech facials are no longer a thing of the future, but for the “40-somethings” a part of their regular regime, to promote, induce and sustain long term tissue tightening collagen stimulation and reverse the signs of aging.

Jamie mentions that there is a lot of confusion in the market today regarding bio-current, micro-current, Thermage, Titan and Aluma, photo facial, laser genesis, IPL, radio frequency, electrodes, infra red, CO2 laser, LED. How do you know which technology is right for you? Should you try micro-dermabrasion, the lunch time peel, the NON-Surgical facelift? You have a lot of choices, and after a consultation with Jamie Lee Metz you will know what's best for your skin type and condition to get THE RESULTS you're looking for.

Said Jamie Lee Metz, we brush our teeth and wash our face daily, but need a hygienist for the deeper plaque removal and to lighten and brighten our smiles. It's the same with our skin. At Jamie Lee Metz, our Advanced Skin Care Aestheticians will dislodge the impurities that we cannot remove with daily cleansing alone.
